

- e. Navigate to *Start>Printers and Faxes*. On the Printers and Faxes screen, right click on the *Wasp LabelWriter 330 Turbo-USB*, then select *Properties*:

The *Properties* screen appears.

- f. On the *Properties* screen, click *Print Test Page*:

- g. While the test page is printing, a screen similar to the following appears. Click *OK* on the screen if the test page prints correctly.

If it does not print correctly, click *Troubleshoot* to access the Printer Help and Support Page.

Note: The test page will consist of a Windows Logo. The logo will appear partially cut off on the label. This is normal and should be a successfully printed test page.

Wasp LabelWriter 330 Turbo Printer Quick Start Guide

© 2006 Wasp Technologies

Setting up the 330 Turbo Printer

1. Unpack

Remove the printer from the box and place it on a stable, flat surface. The box will contain:

- Printer
- Power cord and adapter
- USB Cable
- 1 roll of labels
- Installation CD with printable documentation

2. Connect the Power

- Plug the power cord into the power adapter and then to the bottom of the printer (see figure in Step 3).
- Plug the wall plug into a grounded and surge protected outlet or power strip.

3. Connect the USB Cable

- Plug the USB cable into the USB Port on the bottom of the printer:

- Insert the power and USB cables into the cable channel and set the printer down on your work surface.
- Plug the USB cable into an available USB port on your computer. A message similar to the following will appear:

The Found New Hardware Wizard will appear.

4. Install the Printer

- Insert the Installation CD. On the Found New Hardware Wizard screen, click *No*, *Not This Time*, then click *Next*:

- Select *Install the Software Automatically*, then click *Next*.

The install wizard will automatically search for the Installation CD.

- You may receive a message similar to the one shown below:

If you receive this message, click *Continue Anyway* to proceed with the installation.

The software will install.

- When the installation is complete, click *Finish*:
